FRONT END DEVELOPER

PROFESSIONAL OBJECTIVE

Recently acquired certificate as a Frontend developer through SheCodes and seeking challenges where creativity and diverse skills are required. Identifying bugs in projects shown through recent area of education resulting in better understanding in languages and debugging and fixing other issues. A quiet environment will be valued and respected. Looking to apply recently acquired knowledge and skills of a new industry to develop and improve the projects or applications through development and creativity. Highly creative and adaptable, continuous learning of new techniques and skills.

HARD SKILLS

Web Development | Video and Audio Editing | Adaptability | Attention to Detail | Continuous Learning | Creativity | Understanding of SEO | Understanding of UI/UX Design

CAREER HIGHLIGHTS

- Created, designed, and coded applications such as a World Clock, AI Poem Generator, a Dictionary resulting in visualised applications for a frontend developer portfolio.
- Solving, identifying, and debugging issues in code, resulting an improved website or application using front-end development technologies and practices such as wireframing, React.js framework and CSS styling including CSS flexbox and Bootstrap.
- Creativity and Design from previous and recently finished studies, including projects completed on own terms, resulting in user-friendly, high-quality websites and projects.
- Adaptability to working in several industries, shown through employment requiring different ways or creative thinking to complete tasks, resulting in a different mindset that can improve project outcomes.
- Continuous learning is shown through areas of study, and project interests including personal projects, resulting in learning new coding languages, tools, and techniques to develop and improve websites or application outcomes.
